Terms of Service & End-User Agreement

JOAP Hardware Trading ERP · v1.0 · Issued for SOFTENG 2 fulfilment

This Terms of Service ("Agreement") governs the use of the JOAP Hardware Trading point-of-sale and inventory management system ("the System"), developed by Cabilao Keane Andre B., Ebona John Marwin R., and Mirasol Prince Marl Lizandrelle D. ("the Developers") as part of the fulfilment of Software Engineering 2 coursework, and delivered to JOAP Hardware Trading ("the Client") pursuant to feedback and interviews collected from the Client's staff and ownership.

1. Scope of the System

The System is a custom-built ERP covering inventory management, point-of-sale transactions, reservations, accounting ledger entries, demand forecasting, and basic reporting. The System is delivered AS IS, configured to the workflows documented during the requirements-gathering phase.

Inventory tracking with starting-stock based low/critical bands and ROP alerts.

Walk-in, online, reservation, and pickup order types with partial release.

Double-entry accounting with auto-posted ledger pairs on payment.

Role-based access (Admin, Inventory Manager, Employee, Super Admin).

2. Acceptance of Risk

By clicking "I Agree & Continue", the Client acknowledges and accepts that the System is academic coursework provided in good faith and that the Developers shall not be liable for any direct, indirect, incidental, consequential, or punitive losses (including but not limited to lost revenue, lost inventory, missed sales opportunities, regulatory fines, customer disputes, or data corruption) arising from the use, misuse, or unavailability of the System beyond the documented scope above.

3. Data & Privacy

All transactional data is stored in a MongoDB cluster operated by the Client. Daily JSON backups are emailed to the address configured in Maintenance → Backup Email. The Developers do not access live Client data except when explicitly granted credentials by the Client for the purpose of bug-fixing or migration support.

4. Support & Maintenance

Bug-fix support is provided on a best-effort basis through the academic term. After turnover, ongoing maintenance is the Client's responsibility unless a separate engagement is agreed in writing.

5. Intellectual Property

Source code, design assets, and documentation are jointly owned by the Developers and licensed in perpetuity to the Client for the operation of JOAP Hardware Trading. Sub-licensing, resale, or redistribution to third parties is not permitted without written consent from the Developers.

6. Limitation of Liability

In no event shall the aggregate liability of the Developers exceed zero (P0), as the System is delivered without monetary consideration. The Client agrees to indemnify the Developers against any third-party claims arising from the Client's operation of the System.

7. Governing Law

This Agreement is governed by the laws of the Republic of the Philippines. Any dispute shall be resolved in the courts of Rizal Province.

8. Acknowledgement

By scrolling to the end of this Agreement and clicking "I Agree & Continue", the Client confirms that they have read, understood, and accept every clause above on behalf of JOAP Hardware Trading.
